

Choose from our range of quality Honeywell thermostats

We only sell thermostats produced by Honeywell which has been in operation in Australia since 1962 because of their precise temperature setting, proven quality and reliability which come with a full 2 year warranty for peace of mind.

All the thermostats in our range can be used for under floor heating.

For ceiling heating all the thermostats can be used apart from the CM907.

Please note that the TH232 Model is recommended for bathrooms and humid areas.

TH232 Fully programmable thermostat

Floor sensing model \$260.00

Air sensing model \$240.00

Optional back plate \$10.00

- Stylish, ultra-compact with large, clear digital display
- Recommended for bathrooms and humid areas
- Energy saving with accurate 7-day, 4 periods a day programming
- Easy to set up with accurate home heating control
- Auto, manual or vacation operating modes
- LCD backlight display for low light conditions
- Configurable for Floor Control (default setting), Air Control or Air
- Control with floor over temperature protection
- The optional remote sensor with lead allows for floor temperature sensing and/or the remote location of the thermostat where necessary
- Battery-free program backup
- Attractive adapter plate available for rectangular flush boxes
- Temperature range 5 - 30°C
- The contact rating 230V 15amp is compatible with most domestic central, under floor and ceiling heating systems

TH131 Manual thermostat

Floor sensing model \$160.00

Air sensing model \$140.00

Optional back plate \$10.00

- Slim line modern design
- Non-programmable accurate home heating control
- Offers the simplicity and basic features of a conventional dial thermostat
- Temperature range 5 - 35°C
- Vertical wall mounted
- Option of air only, Air and floor, or floor only sensing
- The contact rating 230V 15 amp is compatible with most domestic central, under floor and ceiling heating systems

TH115 Fully programmable thermostat

Floor sensing model \$260.00

Air sensing model \$240.00

- Slim line modern design with large, clear digital display
- Energy saving with 7-day, 3 periods a day programming
- Easy set-up accurate home heating control
- Temperature range 5 - 30°C
- Vertical wall mounted
- Option of air only, Air and floor, or floor only sensing
- The optional remote sensor with lead allows for floor temperature sensing and/or the remote location of the thermostat where necessary No batteries
- The contact rating 230V 16.7amp is compatible with most domestic central, under floor and ceiling heating systems

CM907 Fully programmable thermostat

Floor sensing model \$265.00

Air sensing model \$245.00

- Attractive, slim, design with large, clear digital display
- Energy saving with 7-day, 6 periods a day programming
- Easy to set up with accurate home heating control
- Override buttons for day off, party and holiday override modes
- LCD backlight display for low light conditions
- The optional remote sensor with lead allows for floor temperature sensing and/or the remote location of the thermostat where necessary
- Memory holds the user program indefinitely
- Built-in default heating program
- Tamper proof options e.g. limit maximum temperature
- Automatic summer / winter time change
- Off mode with integrated frost protection
- Extra functions can be set to suit the user's needs
- Battery powered with 2 year battery life
- Temp range: 5 - 35°C
- The contact rating 240V 8amp is compatible with most domestic central, underfloor and ceiling heating systems
