

# Comfortline Terrace Heater

## For Indoor & Outdoor Use

The Comfortline Terrace heater is a sleek, modern and elegantly designed radiant heater with no glare for domestic and commercial applications.

### APPLICATIONS:

- ✓ Patios and Terraces
- ✓ Studios
- ✓ Churches
- ✓ Hospitals
- ✓ Schools and Colleges
- ✓ Enclosed and roofed balconies and terraces
- ✓ Conservatories
- ✓ Pub Gardens and Courtyards
- ✓ Garden tents
- ✓ Sports Halls
- ✓ Shops
- ✓ Offices and Reception areas

\*\* Please note suitable applications include only those where the panels are protected against driving rain.

### FEATURES:

- ✓ 5 Year Warranty!
- ✓ Cost effective and efficient
- ✓ Based on the science of radiant heat which efficiently heats people and objects rather than the air itself
- ✓ Easy Installation: electrical installation (230V)
- ✓ Low maintenance
- ✓ Ideal for indoor or outdoor use (protected environments)
- ✓ Available in 1000 and 1500 Watt versions

### TECHNICAL INFO:

- ✓ The min. height for installation is 1.8 m above the floor
- ✓ For panels installed on the ceiling there must be a min. gap of 30 cm between the ceiling and the upper edge of the panel
- ✓ Panels are supplied with a 2m cold lead and plug
- ✓ Panels have an IP 45 rating
- ✓ Tilttable brackets are included with the product
- ✓ Brackets for clustering heaters at varying angles are available
